

inventathon

A 24-HOUR COMPETITION TO SOLVE UNMET MEDICAL NEEDS.

The Inventathon is a 24-hour competition to create and pitch the best solution to a healthcare problem. It can be a mobile app, an embedded device, or a conceptual drawing. You can use whatever tools you want, and we will have mentors during the competition to offer feedback.

Open to all. No experience necessary.

Winners will receive prizes and opportunities to keep developing their solution. All prototyping must be performed for the 24 hours of the event (However, you can, and are encouraged to think of ideas and practice with the tools you'll be using beforehand). Teams must have **3 to 5 members**. It's a good idea to choose team members with complementary skills.

October 17-18, 2014

**California NanoSystems Institute,
Los Angeles**
